Spiritual Living

"Throughout the universe there's a network of wires stretching to infinity. The horizontal wires are placed in space; the vertical in time. Everywhere where these wires cross each other, there's an individual. And every individual is a crystal bead. The big light of an Absolute Being enlightens and penetrates each crystal bead. And every crystal bead reflects not only the light of all other crystals in the network, but also every other reflection, from all corners of the Cosmos." Indra's Net
